COMMUNITY ASH DIEBACK PROJECT

SURVEY DATA FORM

<https://slef.org.uk/slef-ash-dieback-project.asp>

Please submit records of ash trees infected with ash dieback, as follows:

One sheet per tree or per group of trees/saplings, as appropriate

Name:

Contact:

Date:

dd/mm/yyyy

Location:

Place name and/or description

OS Grid Reference (or latitude:longitude or what3words):

Smart phone apps are ideal for this purpose. Recommended (Android): GPS Waypoints Navigator from DS Software (£6.60); GPS Test Plus (free or £10 without ads). Probably built into iPhone or use an Apple app. OR identify a three-word location using the what3words app (free).

Image(s): 1. The site; 2. Whole tree(s); 3. Diseased portion of tree; 4. Close-ups as relevant

Please submit by e-mail to huntsup@theyorkwaits.org.uk Add image file identifiers and brief descriptive notes here:

Tree description: **Sapling** (narrow ~2-4m) – **Medium** (spreading ~4-10m) – **Mature** (> 10m)

Size ranges are approximate: for guidance only

Notes, Comments and Observations:

Include sightings of 100% healthy trees (date/full GPS or other accurate locator) plus photos: whole tree and close-up of crown.

Ideally, please visit the site once every year when trees are in leaf and report on progress.

Send/deliver completed forms to: James Merryweather, The Whins, Auchtertyre IV40 8EG
or scan and e-mail to huntsup@theyorkwaits.org.uk
